

Task II: Identify Entities, Attributes, Primary Keys, and Relationships for the Wishlink System

Introduction

The Wishlink system is a creator-commerce platform that connects creators, brands, and customers. Creators recommend products through affiliate links, customers purchase products, and brands collaborate with creators. To manage these operations, the system requires several entities, each with its own attributes, primary keys, and relationships.

1. Entity: User

Primary Key: User_ID

Attributes:

- User_ID
- Full_Name
- Email
- Phone_Number
- Password
- Role (Creator/Customer/Admin)
- Date_of_Registration

2. Entity: Creator

Primary Key: Creator_ID

Attributes:

- Creator_ID
- User_ID (Foreign Key)
- Store_Name
- Social_Media_Link
- Followers_Count
- Commission_Rate

3. Entity: Brand

Primary Key: Brand_ID

Attributes:

- Brand_ID
- Brand_Name
- Contact_Email
- Contact_Number
- Brand_Category

4. Entity: Product

Primary Key: Product_ID

Attributes:

- Product_ID
- Brand_ID (Foreign Key)
- Product_Name
- Category
- Price
- Stock
- Description

5. Entity: Affiliate Link

Primary Key: Link_ID

Attributes:

- Link_ID
- Creator_ID (Foreign Key)
- Product_ID (Foreign Key)
- Link_URL
- Date_Created

6. Entity: Order

Primary Key: Order_ID

Attributes:

- Order_ID
- User_ID (Foreign Key)
- Product_ID (Foreign Key)

- Quantity
- Order_Date
- Order_Status
- Total_Amount

7. Entity: Commission

Primary Key: Commission_ID

Attributes:

- Commission_ID
- Creator_ID (Foreign Key)
- Order_ID (Foreign Key)
- Commission_Amount
- Payment_Status

Relationships

Entity 1	Relationship	Entity 2
User	Creates	Creator Profile
Brand	Offers	Products
Creator	Shares	Affiliate Links
Affiliate Link	Refers to	Product
Customer (User)	Places	Order
Order	Generates	Commission
Creator	Earns	Commission

ER Relationship Summary

- One **User** can have one **Creator** profile.
- One **Brand** can have many **Products**.
- One **Creator** can create many **Affiliate Links**.
- One **Product** can have many **Affiliate Links**.
- One **User (Customer)** can place many **Orders**.
- One **Order** generates one **Commission** (if purchased through an affiliate link).
- One **Creator** can earn many **Commissions**.

Conclusion

The Wishlink system consists of entities such as User, Creator, Brand, Product, Affiliate Link, Order, and Commission. Each entity has a unique primary key and attributes that store relevant information. The relationships between these entities ensure efficient management of creators, products, affiliate links, customer orders, and commission payments. Together, these entities form the foundation of the Wishlink database system.
